IRCEP CHALLENGES

Field	Details
1. Name of Challenge	CODECO Data generator
2. Partners	UPRC (Contact Person – Pepi Paraskevoulakou at e.paraskevoulakou@unipi.gr)
3. Submission Specifications	**Challenge #1:** Participants are invited to use **version 1** of the SDG in combination with the **main version** of the Data Generator. The goal is to develop a new version capable of leveraging the synthetic data generation approach from SDG v1, alongside the real CODECO CRDs from main Data Generator. This new version should generate synthetic data that closely reflects the real CODECO CRD. Participants are expected to deliver results, including evidence and validation that demonstrate the accuracy of the synthetic data produced by the updated SDG.
4. Plataforms to be used	ECL Gitlab (pull request) and a .zip file or a Github repository for results and demonstrations
